

## **MOBILEGOV BECOMES A CONTRIBUTING MEMBER OF OATH**

### **Presentation of OATH**

The Initiative for Open Authentication (OATH) is a collaborative effort of IT industry leaders aimed at providing a reference architecture for universal strong authentication across all users and all devices over all networks.

### **Become a member of OATH**

OATH participants hope to foster use of strong authentication across networks, devices and applications.

OATH is actively seeking all participants who share a common vision of open authentication.

Companies who join the OATH initiative will be the market leaders in a new era of network interaction based on strong authentication principles, where information is freely yet securely shared between devices, people, and networks.

### **General benefits of OATH membership:**

- Opportunity to influence the direction of open authentication standards and technologies
- Access to thought leadership in open authentication
- Early access to emerging technical standards, resulting in faster development of new products and earlier market entry
- Opportunity to meet face-to-face with leading industry participants for partnership building

### **Specific benefits of OATH membership:**

- Opportunity to participate in technical, marketing and administrative committees
- Early access to draft technical standards
- Opportunity to attend conference calls and meetings throughout the year, networking with other organizations in vertical and horizontal sectors
- Opportunity to participate in interoperability testing and demonstrations
- Ability to influence the direction of the organization
